About us

Located in the Kalamunda foothills, Munda Mia Therapeutic Community offers a residential treatment program to women experiencing problems as a result of their alcohol and/or drug (AOD) use. The program utilises the evidence based Therapeutic Community (TC) model of treatment.

In the TC, we use active participation in group living and activities to drive individual change and the attainment of therapeutic goals. The program encourages self-responsibility and guides the individual towards optimal health and wellbeing.

Treatment consists of a four-stage program where residents are supported to meet their identified needs and goals. The program includes support and education for family and domestic violence (FDV), housing, parenting skills and co-occurring mental health conditions.

The Munda Mia TC is a smoke and vape free environment. Support and assistance with remaining smoke and vape free is included in the treatment program.

This service is suitable for:

- Women 16 years and over who are looking to address their alcohol and other drug issues.
- If women are bringing their children to the treatment service, children must be 5 years and under.

“ Life is amazing and doors are opening for me. I finally have freedom in my heart and soul and the knowledge to keep going. ”
